zomato

PS BREAKDOWN

The monthly average no. of orders needs to be increased. It can be done by -

No. of customers

No. of orders per customer

1 USERBASE ANALYSIS

- The target audience
 - The **User Journey**
- Their respective pain points, requirements, and points of view (i.e. **User Personas**)

BUSINESS ANALYSIS

- Understanding the revenue model
 - Identification of gaps that hinder no. of orders

2

COMPETITOR ANALYSIS

- Understanding the unique value proposition of the competitors and neutralizing it
- Identifying **potential gaps** to fill to offer Zomato's unique value proposition

UI/UX

- User experience in the existing app
- Overall visual appeal

4

An increase in the
**average number of
orders per month!**

Business Analysis

Why focusing on increasing **monthly transacting customers** & **monthly ordering frequency** matters?

Revenue sources for Zomato

Food delivery

Quick Commerce

Dine-out

Hyperpure (B2B)

others

(primary contributor to increase in food delivery GOV)

Order volume

*

Average order value

(Trends suggest that changes in average order value are negligible, staying within ₹300-400 for most cities)

Average monthly transacting customers

million

Rising MTC to **increase** the GOV by driving up the order volume

6 Cr ATC (annual transacting customers) $\xrightarrow{30\% \text{ (current)}}$ 1.8 Cr MTC (monthly transacting customers)

*

Average monthly order frequency

#

HOW?

Recent performance stats (Q2FY24)

GOV : gross order value

Overall B2C GOV \uparrow 47% YoY

Food delivery GOV \uparrow 20% YoY

Quick comm. GOV \uparrow 29% QoQ

Adjusted Revenue \uparrow 39% YoY

Adjusted EBIDTA \uparrow ₹41 Cr

Performance of **zomato GOLD**

Increasing adoption among users

Q1 post re-launch	Q2 post re-launch	Q3 post re-launch
1.8 Mn	2 Mn	3.8 Mn

High contribution to GOV

40% contribution to food delivery GOV

Profit margins

GOLD < non-GOLD

- Gap is set to fall due to **efficiencies in cost and pricing** of the program
- Company focuses on **Absolute profit** rather than profit margins

zomato vs SWIGGY

COMPETITOR ANALYSIS

General Analysis	Parameter	Market Share	Corporate Meal Solutions	Order Cancellation	Wallet and Gift Cards	Pick-up and Drop service	Grocery	Credit Card Partnership	Restaurant Reviews/Dining	Train Delivery	Premium Plans
	<div><div>Zomato</div><div></div></div>	55%	Yes, Zomato for Enterprise	Not available	Yes	No	Yes, Blinkit	No	Yes	Yes, but limited cities	1
	<div></div>	45%	No	Available (till 60 seconds)	Yes	Yes, Swiggy Genie	No	Yes, HDFC Bank	No	No	2 (lighter plan also available - One Lite)

SWIGGY one	SWIGGY one LITE	zomato GOLD	zomato
FOOD DELIVERY All free deliveries >₹149, <10km • 30% extra discounts • No peak hour surge fees DINEOUT 2 flat ₹150 off coupons/month + Swiggy Genie and Instamart benefits ₹249/3 months 2 devices	FOOD DELIVERY 10 free deliveries >₹149, <10km • 30% extra discounts • No peak hour surge fees + Swiggy Genie and Instamart benefits ₹49/3 months 2 devices	FOOD DELIVERY All free deliveries >₹199, <10km • 30% extra discounts • VIP access during peak hours DINEOUT Up to 40% flat off at 10,000+ partners • No genie or Blinkit Benefits ₹49/3 months 2 devices	No sub-premium offering like Swiggy One Lite

zomato

USER JOURNEY

1. Page divided into 4 parts
2. Starts to browse for the right dish

Opens App

Clumsy restaurant details section

The 2023 year recap isn't personalized

Browses For the Dish

Time-taking process to browse – offers, delivery time, Zomato Gold – all factors

No option for **healthy, home-like food!**

No option for **saving his favorite meal** for instant order

Free items don't get added automatically to the cart – the user needs to look for it and add it manually.

3. User spends time deciding what to eat, offers applicable, Gold eligibility, delivery time etc.

4. Makes up his mind

5. Adds items to the cart

Goes to the Cart

6. Views the order summary and confirms the details.

7. Adds coupons and cooking instructions if applicable.

8. Adds delivery tip and chooses a Payment method

CANCELLATION POLICY
Help us reduce food waste by avoiding cancellations after placing your order. A 100% cancellation fee will be applied.

No Order Cancellation Policy

Order Tracking

The **delivery tip** option is hidden inside the bill summary option

No separate page for choosing a **payment method** resulting in –

1. Can't see offers with payment methods at a glance

2. If in a hurry, the user might forget to change the payment method.

RAJEEV

Software Engineer

Bangalore
(TIER-1 CITY)

Bio : Always tired!

Considers food only as a fuel for sustenance. Living away from his family, wishes to eat healthy ghar-jaisa khaana

Use case : REGULAR

GOALS

Wants to eat healthier meals on a daily basis, like a **tiffin subscription**

Easily **repeat** orders

Is too tired to cook at home or even browse through 1000s of options on the app. Would rather **let the app choose for him**

CHALLENGES

Too many options = Too much confusion

Time consuming order cycle

Can't seem to find good healthy options

Poor user experience

Finds it cumbersome to reorder the same meals

RAJESHWARI

Business-woman

Mumbai
(TIER-1 CITY)

Bio : Absolute FOODIE!

Savors the flavour in each bite. Food to her is the ultimate joy in life and she doesn't hesitate from exploring new places

Use case : REGULAR

GOALS

Loves to explore **newly opened** and **niche restaurants** around her area

Frequently orders grocery online and wants **more offers on grocery purchase**

Wants **better** personalized **filters**

CHALLENGES

Can't filter based on restaurant launch time

No good offers on blinkit app

Poor user experience
Forgets to tip the delivery partner due to it

Finds it cumbersome to reorder the same meals

Can't seem to find good healthy options

ANURAG

Office employee

Patna
(TIER-2 CITY)

Bio : Average Joey!

Stays away from family because of work and uses both Zomato and Swiggy interchangeably.

Use case : NON-REGULAR

GOALS

A simple and pleasing user experience on the app

A lighter version of the premium offerings for his particular use case

Wants to see **some newly recommended restaurants** on the app for his tier-2 city

CHALLENGES

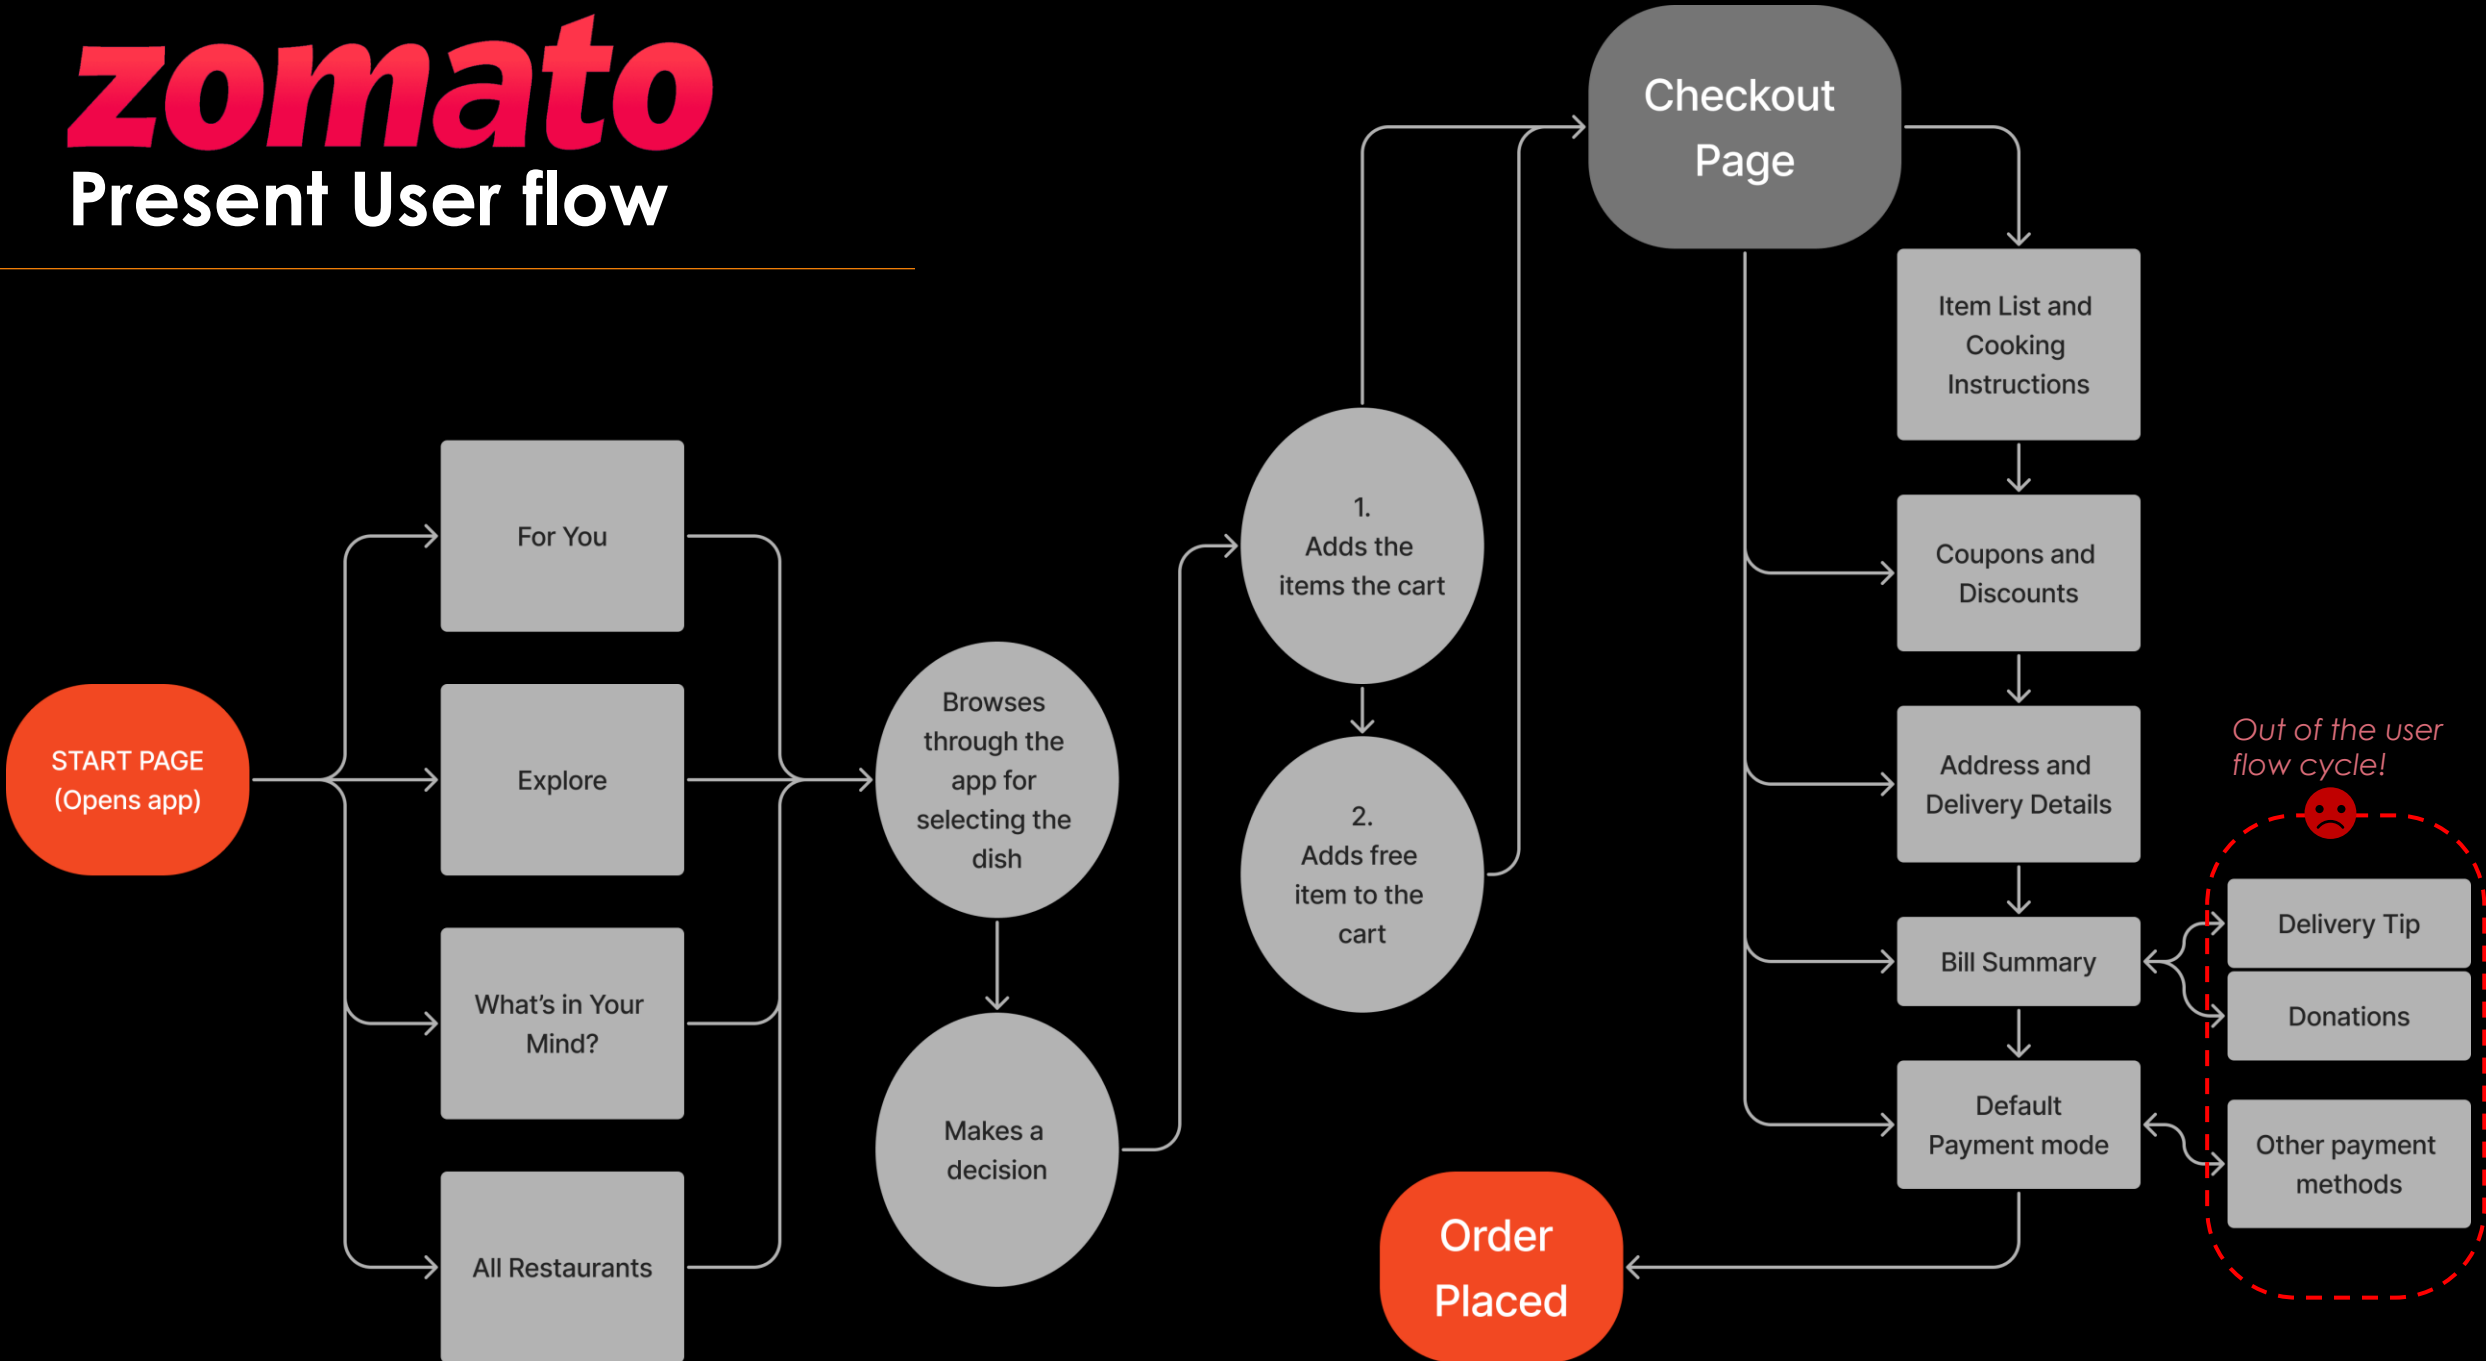

Hates the UX whole heartedly

Orders less, hence finds the GOLD plan too excessive

Cannot cancel once ordered

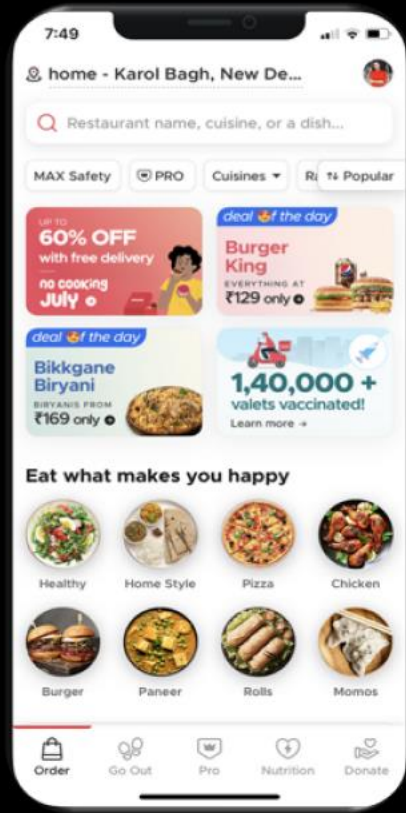

zomato

Present User flow

zomato

Feature 1 – Zomato Suggests

a clutter-free **recommendation system** is what the customers need to order regularly

FROM THIS

TO THIS

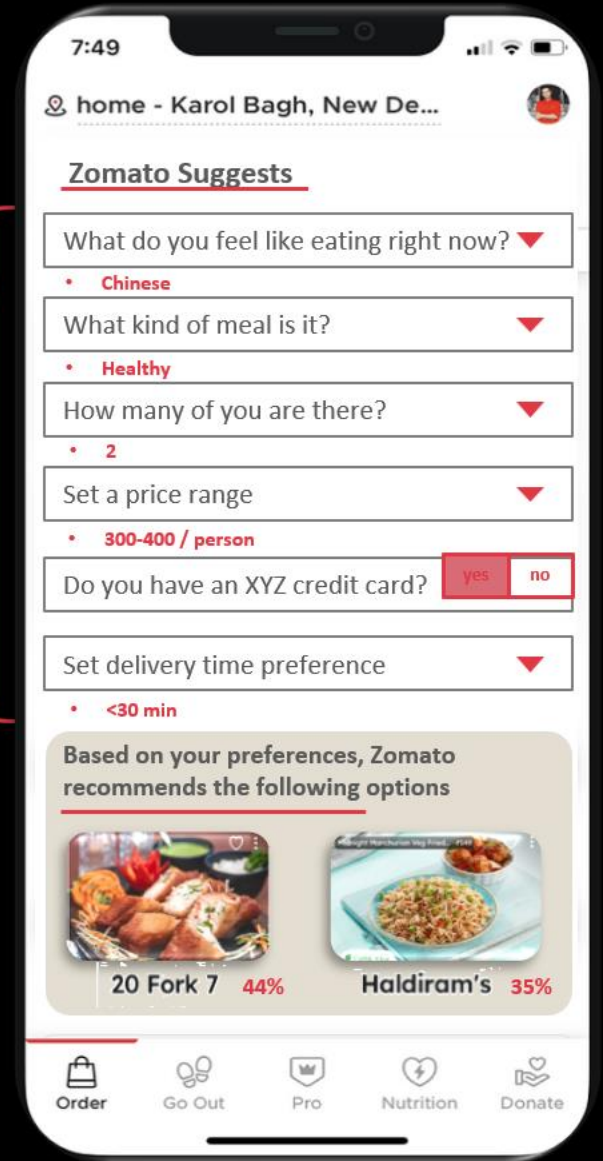

I can't deal with so many options daily

Now, I don't have to spend an hour browsing

A simple recommendation interface to set preferences on a daily basis

zomato

Feature 2 – UI/UX Improvements

1.

Recommended items only show the restaurant's name and time to deliver!

3.

- Decluttering of this page (the cart page).
- Inclusion of delivery tip in the user flow cycle
- A dedicated payments page needs to be added showing offers with each payment mode

2.

- Improper space management!
- Font size below is too small!

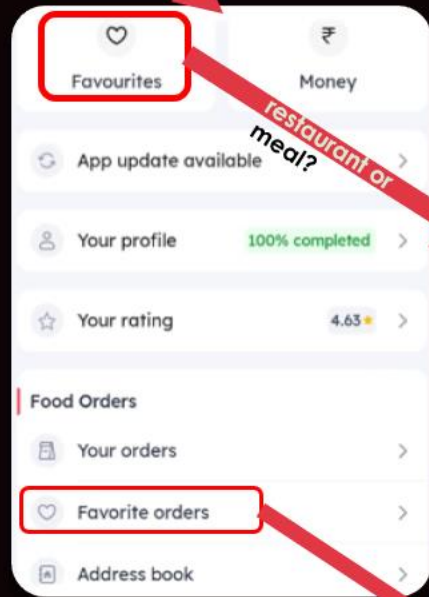

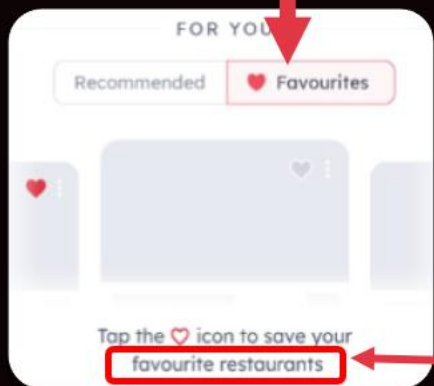

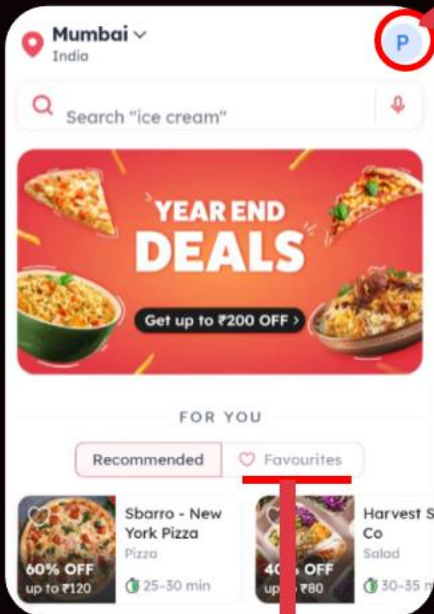

4.

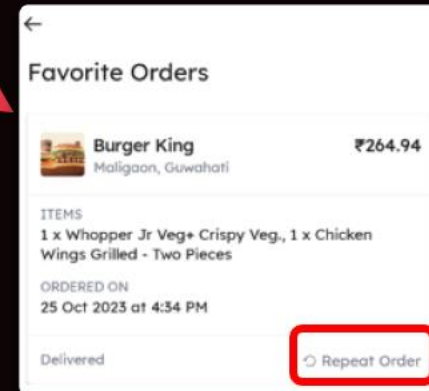

- Implementation of dark mode throughout the application.
- Personalization of Zomato's annual wrap-up!
- Order Cancellation (within 90 seconds)

5. What if I wish to **order** the **exact same meal** that I've previously ordered?

BEFORE

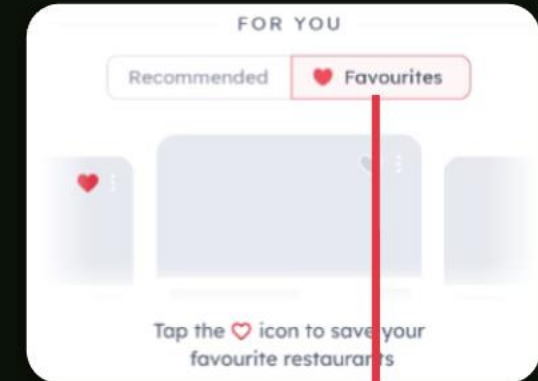

Only shows the **favourite restaurants**

After a long obstacle course, I can now **finally repeat the order**

After

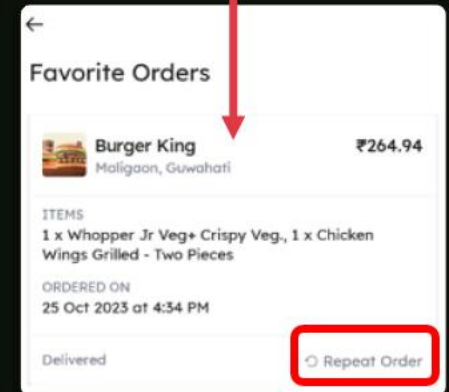

FAVOURITE MEALS TAB

favourite restaurants

- Reduces redundancy
- Simplifies interface
- makes it easy to access saved meals and reorder

favourite meals

zomato

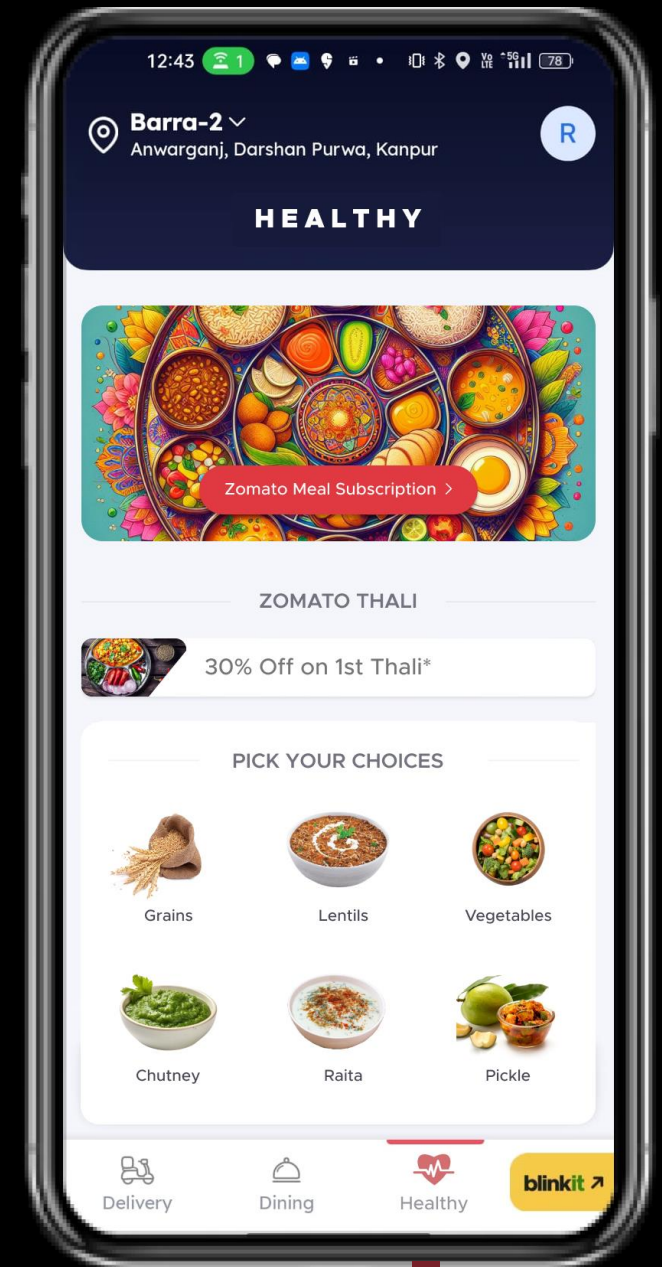

Feature 3 – ‘Healthy Tab’

- Users need an alternative to mess and PG, which is healthy and reasonably priced at the same time
- Zomato getting stereotyped to an occasional fast food delivery service

A 'Healthy' tab where customizable thali is offered (in collaboration with cloud kitchens, and tiffin services)
+
Monthly **Meal Subscription**

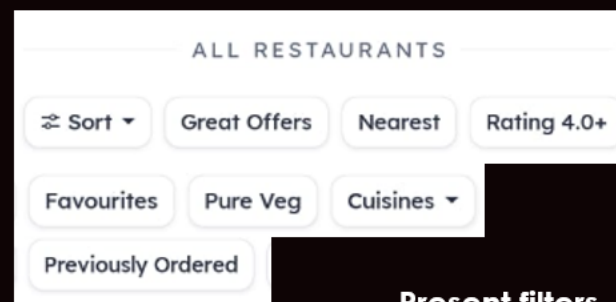

Feature 4 – ‘Newly Launched’ Filter

Giving a chance to the **newly opened restaurants** and a breath of fresh air to the customers!

- Does not allow sorting or filtering based on the launch time of kitchens
- Might bore the frequent orderers
- Famous restaurants overshadow the newly launched kitchens

I'm bored of looking at the same names over and over

New set of filters

Increases options for the frequent customers

Presents visibility to newly launched restaurants in the early stage of launch

Feature 5 Product Segmenting

zomato SILVER

At present, **Zomato GOLD's benefits and pricing** lie intermediate between **ONE** and **ONE LITE**

Zomato **SILVER** can act as a sub-premium offering for
~10 free deliveries on food and
~10 free deliveries on blinkit

2 device limit

Product pricing:
₹49/3 months

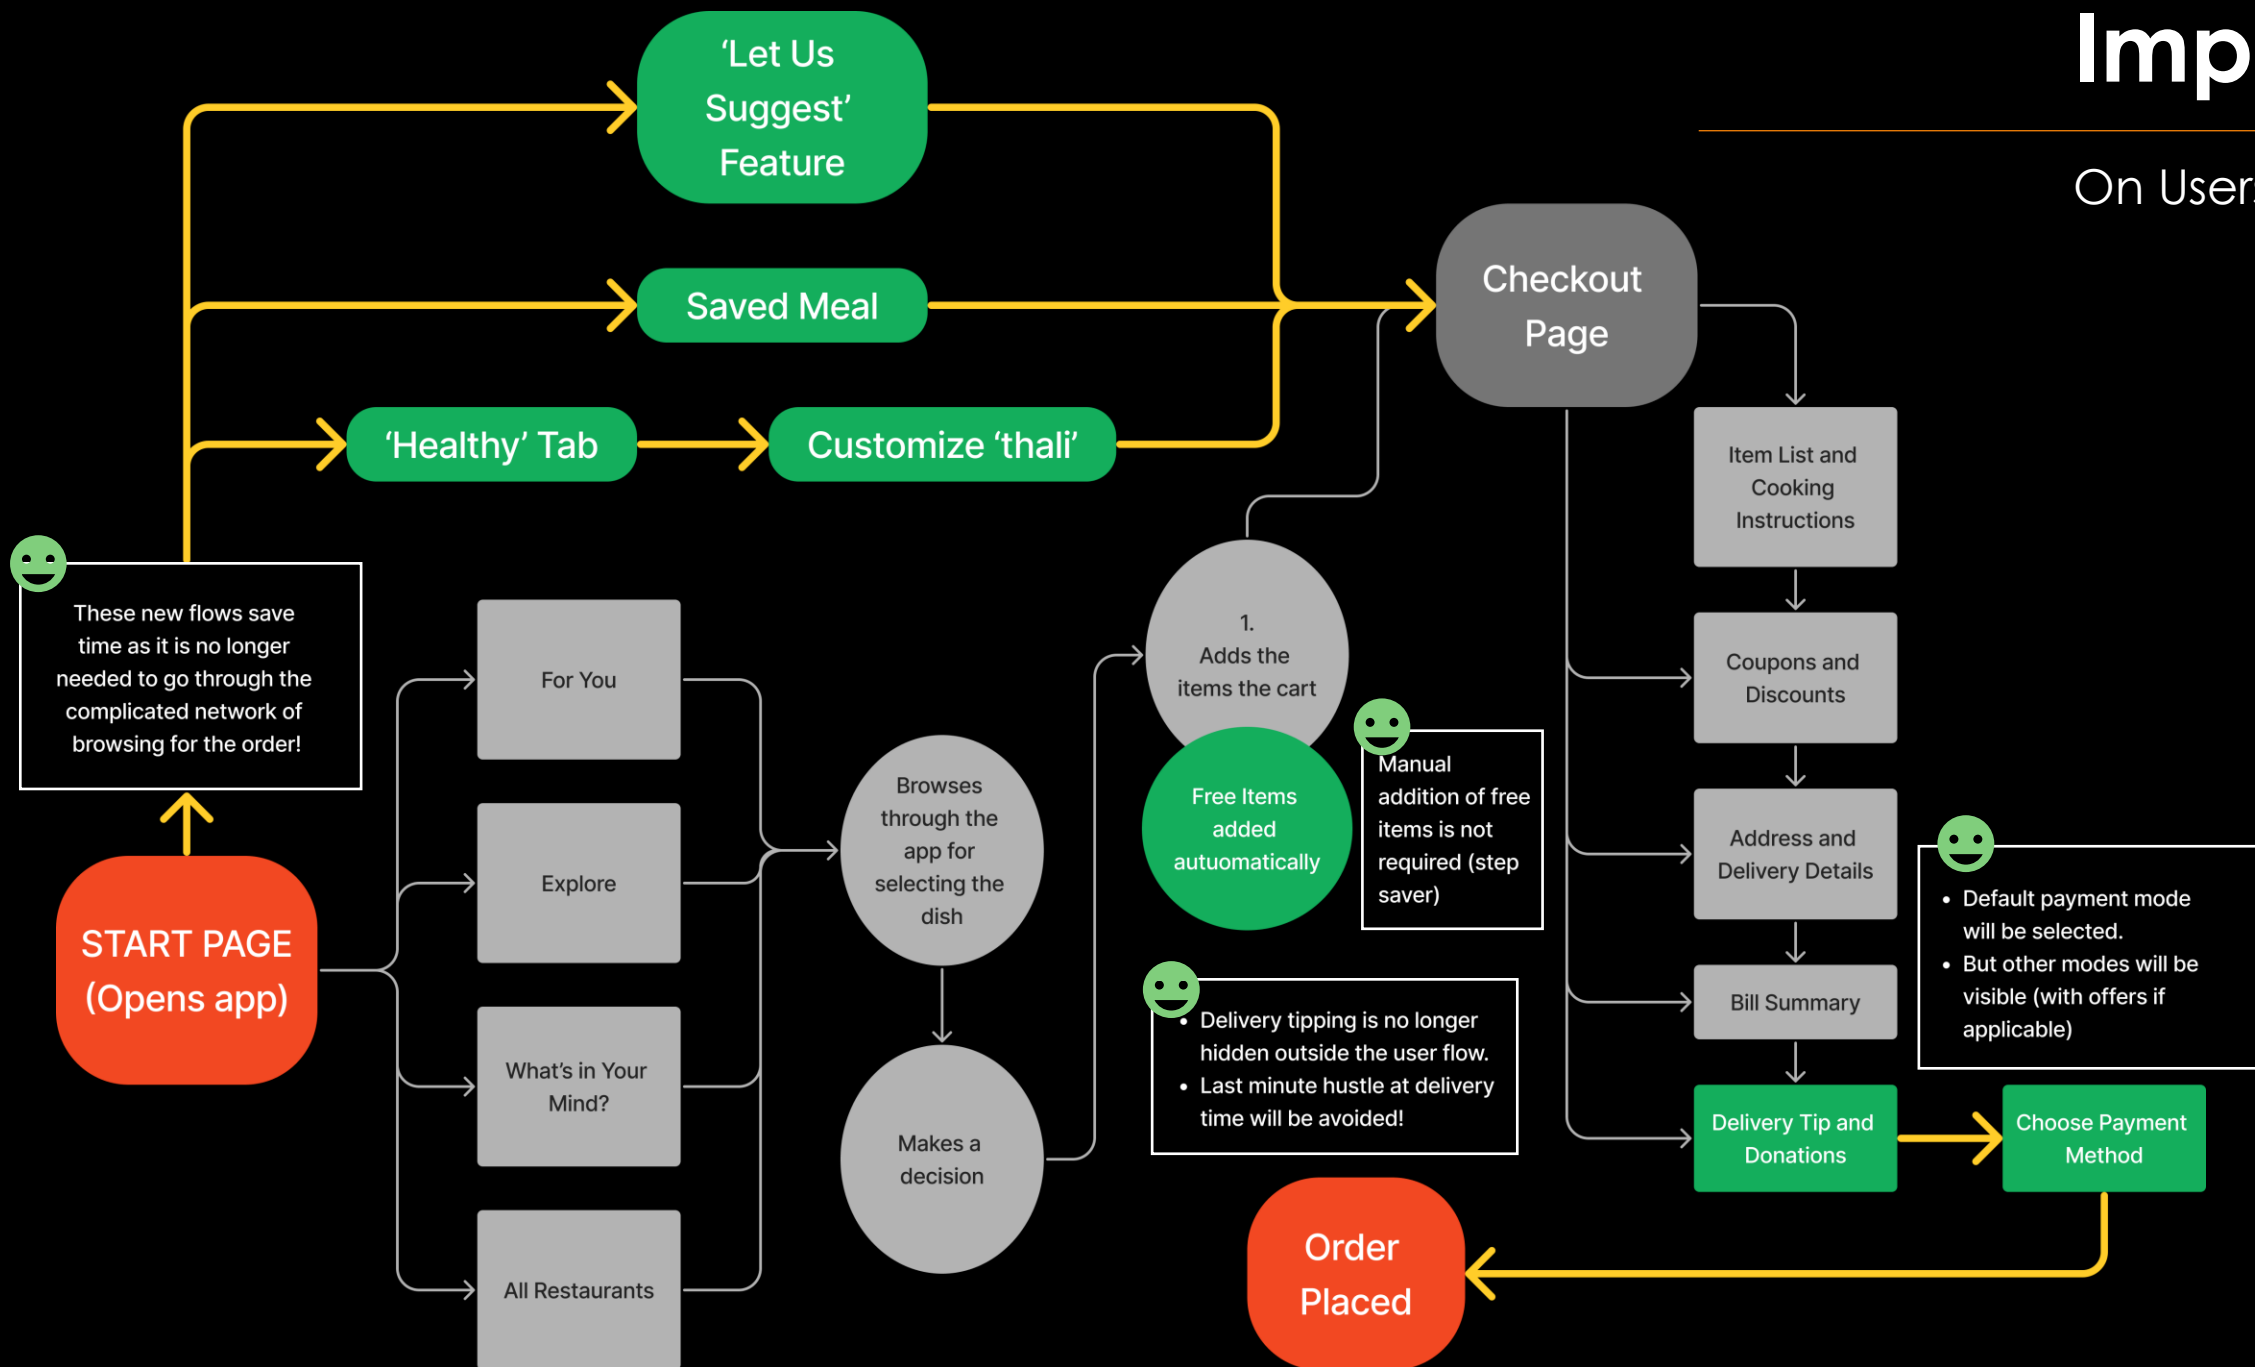

RICE Analysis – Prioritization

PROJECT	REACH	IMPACT	CONFIDENCE	EFFORT	SCORE
UI/UX Enhancement	100	<div><div></div><div></div><div></div><div></div><div></div></div> Massive	<div><div></div></div> 100%	4	75
Zomato Suggests	80	<div><div></div><div></div><div></div><div></div><div></div></div> High	<div><div></div><div></div></div> 80%	5	26
